THE ROYAL ARCHITECTURAL INSTITUTE OF CANADA

By Hon. Sec. Alcide Chausse

The Royal Architectural Institute of Canada was founded as the Institute of Architects of Canada, 19th August, 1907; was incorporated by special Act of the Dominion Parliament, 16th June, 1908 (7-8 Edward VII, Chap. 82), under the corporate name of "The Architectural Institute of Canada" and was granted Royal permission to adopt the prefix "Royal" to its corporate name, 2nd June, 1909. On 1st April, 1912, the charter of the Royal Architectural Institute of Canada was amended with a view of a general federation of all the incorporated provincial associations of architects in the Dominion, and on the 7th October, 1912, the Alberta Association of Architects, the Manitoba Association of Architects, the Ontario Association of Architects, the Province of Quebec Association of Architects and the Saskatchewan Association of Architects were federated to the Royal Architectural Institute of Canada, and as a consequence all the members of the above provincial associations became members of the Royal Architectural Institute of Canada, besides those who had already joined under the first charter.

The objects of the Royal Institute, as set forth in its charter, are "to facilitate the acquirement and interchange of professional

knowledge among its members, and more particularly to promote the acquisition of that species of knowledge which has special reference to the profession of architecture, and further to encourage investigation in connection with all branches and departments of knowledge connected with the profession." There are four classes of members: Honorary Members, who are persons eminent in architecture or kindred sciences; Corresponding Members, persons not residing in Canada, eminent as architects or archeologists, or in art, science or literature, who may render assistance in promoting the objects of the Royal Institute; Fellows, members who shall have notably contributed to the advancement of the profession in design, construction, literature or education; Members, only admitted through the membership of federated provincial associations of architects.

The General Annual Assembly of the Royal Architectural Institute of Canada is held in September or October.

The Council of the Royal Architectural Institute of Canada is composed of the delegates of the federated provincial associations of architects, and the officers of the Royal Institute are elected by this Council from the delegation or Council.

CHRONOLOGICAL HISTORY OF THE FOUNDATION AND OF THE INCORPORATION OF THE INSTITUTE

Friday, 12th April, 1907

Postal cards are sent to five hundred architects, all over the Dominion of Canada, suggesting the formation of a National society of architects, under the name of "Institute of Architects of Canada."

Wednesday, 19th June, 1907

Formation of the Provisional Board of the Institute of Architects of Canada, this Board was composed of twenty architects, the President of each society of architects and clubs of architecture then existing in Canada, and the leading practitioners in every province of the Dominion.

Tuesday, 9th July, 1907

First meeting of the Provincial Board, at Ottawa, in the Public Library, at which meeting it was decided to hold a Congress of Canadian Architects at Montreal, during the week of the 19th of August 1907, to form the Institute of Architects of Canada, to adopt a project of an Act of Incorporation and to elect officers.

Monday, 19th August, 1907

Meeting of the First Congress of Canadian Architects and First Convention of the Institute of Architects of Canada. Formation and Foundation of the Institute of Architects of Canada, adoption of a project of an Act of Incorporation and election officers, etc.

Saturday, 19th October, to Saturday, 16th November 1907

Publication during five consecutive weeks in the "Canada Gazette," in English and French, of the Notices of Application to Parliament to incorporate the Institute of Architects of Canada.

Tuesday, 22nd October, 1907

A circular containing the resume of the proposed Act of Incorporation was sent to every known architect and to every known society of architects in Canada.

Saturday, 2nd November, 1907

The first issue of the "Quarterly Bulletin of the Institute of Architects of Canada" containing the complete draft of the proposed Act of Incorporation was sent to every known architect and to every known association of architects in the Dominion.

Wednesday, 20th November, 1907

Deposition of the draft of the proposed Bill or Act to incorporate the Institute of Architects of Canada with the Clerk of the House of Commons, Ottawa.

Thursday, 28th November, 1907

Opening of the Session of the Dominion Parliament.

Friday, 20th December, 1907

Petitions praying for incorporation under the name of the "Institute of Architects of Canada," sent to the House of Commons, to the Senate, and to Governor-General in Council.

MOUNTAIN SPRING BREWING CO., LTD.
CALGARY, CANADA

Thursday, 21st May, 1908

The Act to incorporate "The Architectural Institute of Canada" was read a third time and passed without amendment.

28th September to 1st October, 1908

Annual General Assembly was held in the Lecture Room of the Public Library, Ottawa. The work of the Assembly was almost absolutely confined to the adoption of by-laws, code of ethics, schedule of charges, regulations for competitions, &c. After the adoption of the by-laws 178 members were classed as Associates and on the last day of the Assembly 115 of these were transferred to the class of Fellows. Application was made to the Royal Institute of British Architects for the affiliation of the Architectural Institute of Canada with them and also "that this Institute be requested to write formally to the various Canadian Associations looking to amalgamation, affiliation or federation".

4th January, 1909

The Architectural Institute of Canada was admitted to alliance with the Royal Institute of British Architects.

2nd June, 1909

The Institute received a letter from Colonel Sir John Hanbury Williams, K.C.V.O., Secretary to His Excellency The Governor General, intimating that His Majesty, the King, had been graciously pleased to grant permission to The Architectural Institute of Canada to adopt the prefix "Royal".

Up to the month of July, 1909, there had been admitted to membership twenty-three Honorary Members, eighteen Corresponding Members and sixteen Associate Members, four of

the latter having been, later, transferred to the class of Fellows, in addition to the membership previously referred to. The Right Hon. The Earl Grey, G.C.M.G. &c., is made Patron of the Royal Institute.

The final act of federation of all Provincial Associations under the title of the Royal Architectural Institute of Canada was the principal work of the Fourth Annual General Assembly held at Montreal, October 2nd and 3rd, 1911.

Commenting on this "Construction" says:

"The Annual Convention of the Royal Architectural Institute of Canada (held on the above date) was, next to that in which it was formed, the most important in its history. In the consolidation of all the Provincial associations under one governing body, it has unified the architectural interests of the Dominion and brought to a point of execution the many measures that have been held in abeyance through the many different organizations acting on a more or less independent basis. It has placed the profession in Canada on a plane with that of other nations, and in its potential aspect is a signal event in the history of Canada's advancement along artistic and constructive lines * * * It congratulating Canada upon this unification of its architectural organizations Construction believes that the convention at Montreal has done a work that will have a beneficial effect upon the future architecture of the Dominion, and a restraint upon the haphazard manner in which growth in public structures and improvements has been carried on. This generation will not be the only one that will look back upon this convention at Montreal as an epoch in our national history."

When Architects Convene

To draw up specifications for most modern buildings their unanimous decision is "EMPIRE BRANDS." Good Architects appreciate the fact that they have a reputation to maintain and recommend the best. Wall Plasters that are better than ordinary Plasters are designated

THE "EMPIRE" BRANDS

Wood Fiber Plaster is light, elastic, tough, hard, strong and lasting.

Cement Wall Plaster has unequalled setting and maturing qualities, and gives good quick results.

Finish Plaster makes your walls as hard and durable as marble.

BUILDING SPECIALTIES

"NATIONAL" Steel Studding for fire-proof partitions is cheap and simple to erect. Is light in weight and a great saver of floor space.

"MEDUSA" Waterproofing renders concrete absolutely impervious to water and prevents discoloration even after the heaviest rains.

Let us supply you with descriptive booklets of our various products.

Tregil Roughs

Triumphs of Western Clay Manufacturing

ARCHITECTS of the Dominion have been accustomed to specify imported face bricks on any building of importance. This was necessitated by the lack of any bricks save dry press red bricks of poor quality, in Western Provinces.

The Tregillus Clay Products Co. is showing that the very best possible colors, textures, and qualities, in high grade face bricks, are to be had from a Western Canada factory. At Calgary, Alberta, we are manufacturing rough texture brick in rich harmonies of browns, chocolates, gun metals, red hearts and every desirable color. No long shipments to destroy edges and delay building. Moderate prices and the best quality obtainable on the North-American Continent, force Canadian Architects to specify **Tregil Roughs** and **Tregil Smooths**.

The best buildings erected in Calgary in 1913, are triumphs of the **Tregil Roughs**.

Specify "**TREGILS**" for beautiful, modern brick work.

EVERYTHING IN BRICK

CITY OF CALGARY

CALGARY, the name given originally to the R. N. W. M. P. Fort at the junction of the Bow and Elbow Rivers was Brisbois, but this was cancelled by Colonel Macleod and the name of Calgary, from "Castel Calgary" in the Island of Mull, Scotland, which belonged to the Macleod family, was substituted. The name is happy one, meaning in the Gaelic tongue "clear water."

In the year 1881 Calgary consisted of the Mounted Police Barracks, the Hudson's Bay Company's store, I. G. Baker's store and the house of the officer commanding the police. Two years later (1883) the first train from Winnipeg reached the settlement.

The incorporation of the town of Calgary took place in 1884, its population being at that time about 500, the limits of the town including an area of 1920 acres. The following year saw Calgary attaining the dignity of having a coat of arms granted and during that year a combined Town Hall, police court room and station were erected at a cost of \$1,694, and a fire brigade was also organized.

The first through train from Montreal to the Pacific Coast passed through Calgary in 1886 and carried Sir John and Lady Macdonald as passengers. The Marquis of Lorne (then Governor-General) in his tour of Canada in 1886, made Calgary his last visit before returning to Eastern Canada, and the town was visited by H.R.H. the Duke of Connaught, now Governor-General of Canada, in 1890.

The Calgary-Edmonton branch of the Canadian Pacific Railway opening up the vast territory to the north of the city, commenced operation early in the year 1891 and two years later the Macleod branch started operation.

In 1894 Calgary was incorporated as the "City of Calgary."

The Canadian Pacific Railway located their repair shops, etc., here in the year 1898, the city giving a bonus of \$25,000 and the irrigation works of the C.P.R. were started east of Calgary in 1904.

The city limits were extended in 1907, which year was also marked by the installation of the gravity system of water supply. This forms the commencement of the city inaugurating ownership of the public utilities, as, in the year following, a start was made in the construction of the Municipal Street Railway, which has proved such an immense success.

A change took place in civic administration in 1909 when the commission form of government was introduced. During the same year the Calgary Public Library commenced the erection of their building, this being the first public library in the Province of Alberta.

During 1910 the city limits were extended to include Township 24, Range 1, West of the 5th Meridian. Up to this year, the city had relied for her electric power on steam-driven apparatus, now hydro-electric power, generated on the Bow River, was introduced.

Developments during the year 1911 included the erection of the C.P.R. Hotel and the vast building of the Hudson's Bay Company, the new City Hall is occupied and the new Fire Headquarters erected. The G.T.P. and C.N. Railway Companies submit plans for entrance for the approval of the City Council.

In the year 1912 T.R.H. the Duke and Duchess of Connaught and Princess Patricia visited Calgary. This year saw the C.P.R. shops, the greatest in Western Canada, located in Calgary; a municipally-owned paving plant installed; natural gas piped to the city from Bow Island and the library opened to the public.

It is conservatively estimated that the population of the city of Calgary is 80,000.

DURING the course of your practice you have doubtless been faced with the problem of supplying your clients with a Stone that effectively satisfies discriminating fancies.

As is now well known and generally admitted, the stone quarried in this province does not exactly fulfil all the requirements demanded by people with a taste for the artistic possibilities of a building executed in stone.

Its dull, earthy appearance has precluded its use in many buildings that should have given a better architectural effect to this City, while it is considered in many quarters that its qualities as a constructional material are not all that can be desired.

We take this opportunity of bringing to your notice the "**Buckeye Grey**" sandstone quarried at Cleveland, Ohio, which we think is a more acceptable article than that generally in use here.

The "**Buckeye Grey**" has been in use in Canada for many years and is a favorite with architects on account of its superior qualities.

It is 93-72 silica which renders it as near fireproof as is possible and gives it a great advantage over Indiana Limestone and Granite, and is more uniform in color and texture.

There is a certain defined character in "**Buckeye Grey**" that is lacking in Limestone as it has a smooth grain running through it and is not easily stained by cement.

LIST OF BUILDINGS EXECUTED IN BUCKEYE GREY

CANADA Imperial Bank of Canada Winnipeg
New Lieutenant Governor's Residence Toronto
School of Higher Commercial Education Montreal
Sir Henry Pellatt's Residence Toronto
Carnegie Library Toronto
Municipal Library Toronto
Memorial Hall University of Toronto Toronto

MAYOR'S OFFICE

H. A. SINNOT
MAYOR

CALGARY, CANADA

25th August, 1913

It gives me great pleasure to be in a position to extend to you a most royal welcome on behalf of the citizens of Calgary in particular and the Province of Alberta in general, during the time you are in Alberta. I can assure you that Calgary and the West recognises the fact that were it not for the men of your profession the making of this "Best and Last Great West" would have been almost impossible. We needed you in the up-building of this Empire within a Dominion, and you have successfully attended to all our wants and needs. Because of the above stated facts, I most earnestly and appreciatively extend to you a welcome to this City on behalf of the citizens.

A handwritten signature in cursive script, reading "H. A. Sinnot".

Mayor.
